

Assignment #1: Calculator

1 Submission Guidelines

- Individual submission
- Open-source libraries: Angular, Spring Boot
- Learning Material:
 - <https://angular.io/tutorial>
 - <https://spring.io/guides/gs/spring-boot/>
- Upload your solution as one zip file on MS-Teams
- The ZIP file should include your student registration number.
- The ZIP file should include a How-To document

2 Problem Statement

Build a web-based calculator similar to that of windows. The buttons should be web buttons.

- No need for fancy styling.
- Calculation should be done on the server side.
- For simplicity, you can ignore the difference between the C and CE buttons.
- Repeating pressing the = button does not issue new calculations Handle exceptions such as dividing by 0, by displaying an E.
